

PK-3 Stud Welding Gun

The PK-3 stud welding gun allows different welding elements to be welded on metallic workpieces at lightning speed.

PK-3 SOYER stud welding gun for short-cycle drawn arc welding

Description:

The PK-3 stud welding gun allows the accurate and recoilless welding of studs and welding elements without ignition tip on workpieces with problematical surfaces. When using appropriate accessories, the PK-3 stud welding gun is universally applicable for all stud welding processes (full compatibility).

Technical data:

Welding range:

Studs and pins from M3 - M10 or 2 - 10 mm in diameter

Material:

Steel and stainless steel

Welding process:

Short-cycle drawn arc welding as per DIN EN ISO 14555

Required lift is infinitely variable up to a maximum of 5 mm. Additional adjustment possibility with long support legs and support tube.

Welding and control cables:

3 m highly flexible

Total length with legs:

235 mm

Total height above grip:

138 mm

Total width:

40 mm

Support tube:

Ø 30 mm

Weight:

1 kg without cables

Subject to technical changes
